

AAYUSH SHETTY

Enthusiastic and dedicated Information Science and Engineering student

☎ +919740293359 ✉ aayushshetty1015@gmail.com 📁 Portfolio 🔗 LinkedIn 🐙 GitHub 📍 Mangaluru

A recent graduate in Information Science Engineering with hands-on experience in **full-stack web development**. Proficient in the **MERN stack**, REST APIs, database management, and secure authentication, with a strong focus on problem-solving and building scalable web applications. Developed multiple academic and personal projects using **React, Node.js, Express.js, and MongoDB**.

INTERNSHIP EXPERIENCES

Full Stack Developer | Internship

On-site • Mangalore, Karnataka

Zephyr Technologies

- Develop and enhance **5+ application features** based on project requirements and user needs.
- Implement and test **10+ software components** to improve application functionality and reliability.
- Debug and resolve **15+ application issues** to maintain smooth system performance and reduce recurring errors.
- Collaborate with team members using **Git** and modern development tools across **3+ development workflows**.

Technologies / Skills Used : MongoDB, Express, React, Node.js, Tailwind CSS, PHP

Research Intern | Internship

Feb 2026 - May 2026

National Institute of Engineering and Technology

On-site • Surathkal

- Completed a **4-month research internship** focused on **AI-driven image understanding** and model evaluation.
- Conducted performance evaluation of AI models using a dataset of **9,000+ image-question pairs** and metrics including Exact Match (EM).
- Performed data preprocessing, validation, and quality assessment on **9,000+ research samples** to ensure consistency and reliability.
- Contributed to research dataset curation, experimental analysis, and model benchmarking for image-understanding tasks.
- Used **Python and Git** for research data analysis, preprocessing, and experiment management.

Technologies / Skills Used : Python, Git, Data Preprocessing, Dataset Curation, AI Model Evaluation

SKILLS

Frontend Development :	MongoDB, Firebase, MySQL
Backend Development :	React, Express, Node.js, Tailwind CSS
Databases & Storage :	English, Hindi, Kannada
Full-Stack Development :	JavaScript, TypeScript, PHP
Tools & Platforms :	MERN Stack, CRUD Operations, Authentication & Authorization, API Integration.

PROJECTS

Personal Portfolio Website | 🐙 Github

Individual Project

- Developed a responsive portfolio using **4 core technologies**: React, Vite, TypeScript, and Tailwind CSS to showcase projects, skills, education, and experience.
- Integrated an interactive **3D tech stack model** using Three.js and React Three Fiber for an immersive user experience.
- Implemented **2 theme modes** with persistent preferences using localStorage, alongside gradient effects, glassmorphism, and hover animations.
- Designed **3 responsive layout categories**—desktop, tablet, and mobile—with reusable React components and interactive UI elements.

Technologies / Tools Used : React, Node.js, Express, MongoDB, Tailwind CSS, TypeScript, Three.js

FlowForge — Visual Workflow Automation Platform | 🐙 Github

Individual Project

- Built a visual workflow automation platform supporting **4 node types**: Webhook, Condition, HTTP, and Notification.
- Implemented a workflow engine with **50-step cycle protection** and **30-second execution timeouts**.
- Added **3-layer rate limiting**, JWT authentication, Zod validation, SSRF protection, and detailed execution auditing.
- Developed **45 automated acceptance tests** covering authentication, workflows, webhooks, branching, audit logs, and multi-tenant isolation.

Technologies / Tools Used : MongoDB, Express, React, Node.js, Tailwind CSS, JWT, Zod

CarConnect — Online Used Car Marketplace | 🐙 Github

Individual Project

- Built a **3-role marketplace** with **70+ PHP files** supporting authentication, listings, search, messaging, orders, and reviews.
- Designed a **13-table MySQL database** for users, vehicles, transactions, and marketplace operations.
- Implemented **4 analytics modules** for sales, vehicle views, conversion rates, and user activity.
- Added **OTP verification, RBAC, password hashing, prepared SQL queries, and admin listing approval** for secure operations.

Technologies / Tools Used : PHP, HTML, CSS, MySQL, JavaScript

Munchly — Reels-Based Food Discovery Platform | 🐙 Github

Individual Project

- Built a MERN-stack food discovery platform featuring a **vertical, reels-style video feed** for browsing food content and food partners.
- Implemented **2 distinct user roles** with JWT-based authentication, protected routes, and cookie-based session handling.
- Developed **4 core backend capabilities**: authentication, food content creation, content retrieval, and media uploads using REST APIs.
- Integrated **1 cloud media service (ImageKit)** with Multer and Axios for media uploads and frontend-backend communication.

Technologies / Tools Used : React.js, Node.js, Express.js, MongoDB, REST APIs, JWT, Tailwind CSS, Google OAuth

EDUCATIONS

AJ Institute of Engineering and Technology

B.E in Information Science and Engineering

- **B.E. in Computer Science and Engineering**, AJ Institute of Engineering and Technology.

Dec 2022 - May 2026

CGPA : 7.68/10
